

DCSM Ridge Vents

Continuous ridge vents for metal roofing systems

DCSM is now offering continuous ridge vents for all of our metal roof systems, giving the customer an alternative to the "off ridge" style vents.

Continuous ridge vents are used for attic ventilation and specifically designed for metal roofing systems. On a slope roof an opening is cut out along the ridge line where both slopes meet to allow hot air to escape from the attic space as hot air rises to the highest point.

- Available in all DCSM standard colors
- Full-strength *Kynar 500* finish
- **24 or 26 gauge Galvalume**
- Also available in aluminum, 16oz copper, metallic finish, or acrylic coated Galvalume
- 25, 30 & 35 year paint warranties

5V Crimp Profile

Standing Seam Profile

Ventilated Ridge Vent allows heat to escape from the attic!
